PIL

THE SHIFT:

Orientation of our approaches to **empowerment of people and Institutions** to save and protect wildlife and wildlands.

AFRICAN WILDLIFE FOUNDATION

Sabyinyo Silverback, community Lodge, Rwanda

THREATS

- Limited **African** sense of **ownership** and **stewardship** of wildlife and wild lands
- Limited influenced of the **African Constituency** for conservation
- Inefficient and **unplanned utilization** of land and natural resources

To **engage** and **support leadership** at all levels, including **NGOs**, in their efforts to stabilize Africa's wildlife habitats, protect wildlife and wildlands, eliminate illegal wildlife trade and ensure the development of Africa is inclusive and green.

The vision is of an Africa where
sustainable development
includes thriving wildlife and wild lands
as a cultural and economic asset
for Africa's **future generations.**

To believe in African

Leadership & integrity.

We are most successful when our results
are owned and carried forward
by the citizens of Africa.

To promote

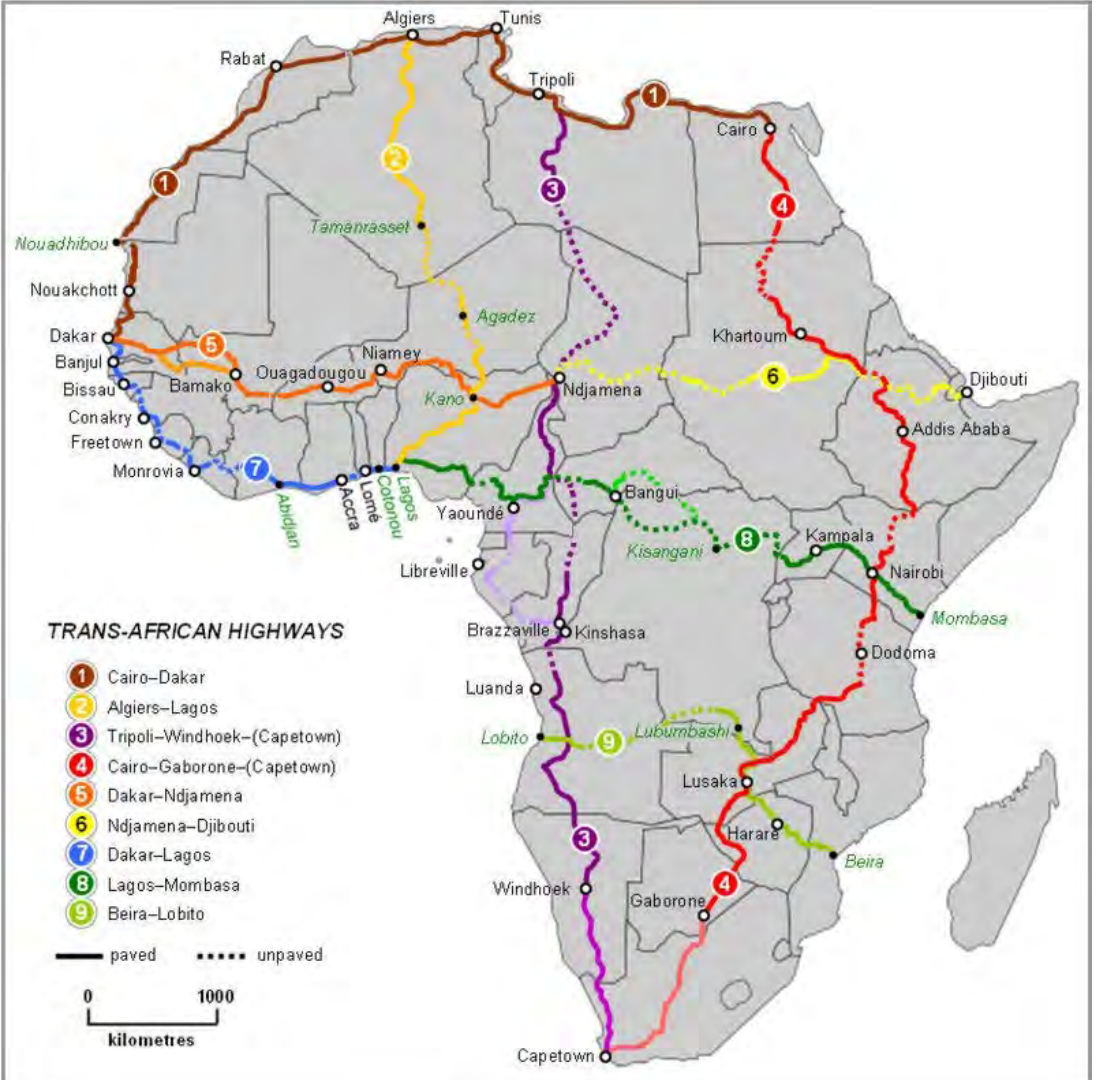
prosperity

That is holistic and pragmatic, creating sustainable conservation gains.

To be successful we need to provide a voice for

African wildlife

Primary advocate should be the young Africans



AFRICAN WILDLIFE FOUNDATION

- The Africa of the next 50 years and the place for wildlife, is being determined by the decision leaders are making today – on economic growth.

Thank you!
