The June 2019 Work Program: **Global Environment Context**

Resources

“

...biodiversity loss is affecting health and socioeconomic development, with implications for well-being, productivity, and even regional security.

”

A large, jagged iceberg floats in the ocean under a cloudy sky. The iceberg's surface is highly textured with sharp peaks and deep crevasses. The water is dark and calm, reflecting the overcast sky. The overall tone is somber and dramatic.

“ “ The critical state of the planet’s ecosystems and the knock-on effect for humankind is beyond debate. It is clear that we need to support life before we are put on life support. ” ”

A photograph of a herd of antelope, likely topi, in a dry, grassy savanna landscape under a clear sky. The antelope are standing in a line, facing left. The text 'June 2019 Work Program' is overlaid in white, centered horizontally, with a thin white line underneath it.

Resources Requested in June 2019 Work Program – By GEF Agency

*Includes fees

STAP Screening of the Work Program

97% of PIFs/PFDs in the Work Program met expectations on scientific and technical quality; only 1 out of 30 screened was proposed for Major Revision

Timely and efficient consultation between STAP, GEF Secretariat and Agencies to clarify concerns on specific projects

Quality advice provided to Agencies and Countries on how to strengthen the scientific underpinnings of projects during preparation phase

Distribution of GEF Financing by programs and projects

Stand-alone Projects
\$197 million

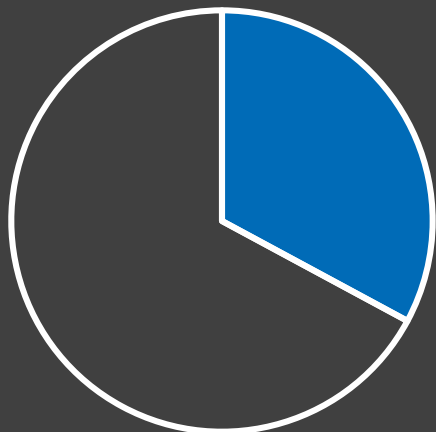

Other Programs
\$173.4 million

Impact Programs

ISLANDS Chemicals & Waste Program

Electric Mobility Program

Global Wildlife Program

\$82 million; \$483 million co-financing

ISLANDS Chemicals and Waste Program

This program will directly eliminate

23,000 tons

Chemicals and associated wastes

197 gTEQ

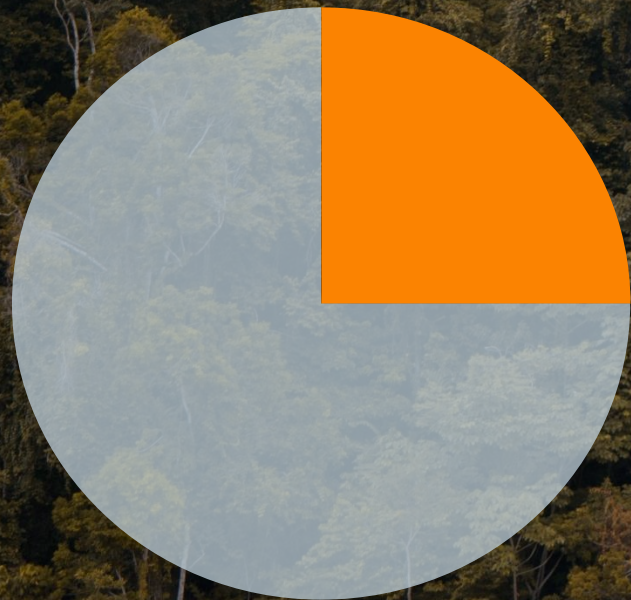

Emissions of UPOPs

And avoid

180,000 tons

Plastics entering the oceans

Electric Mobility Program

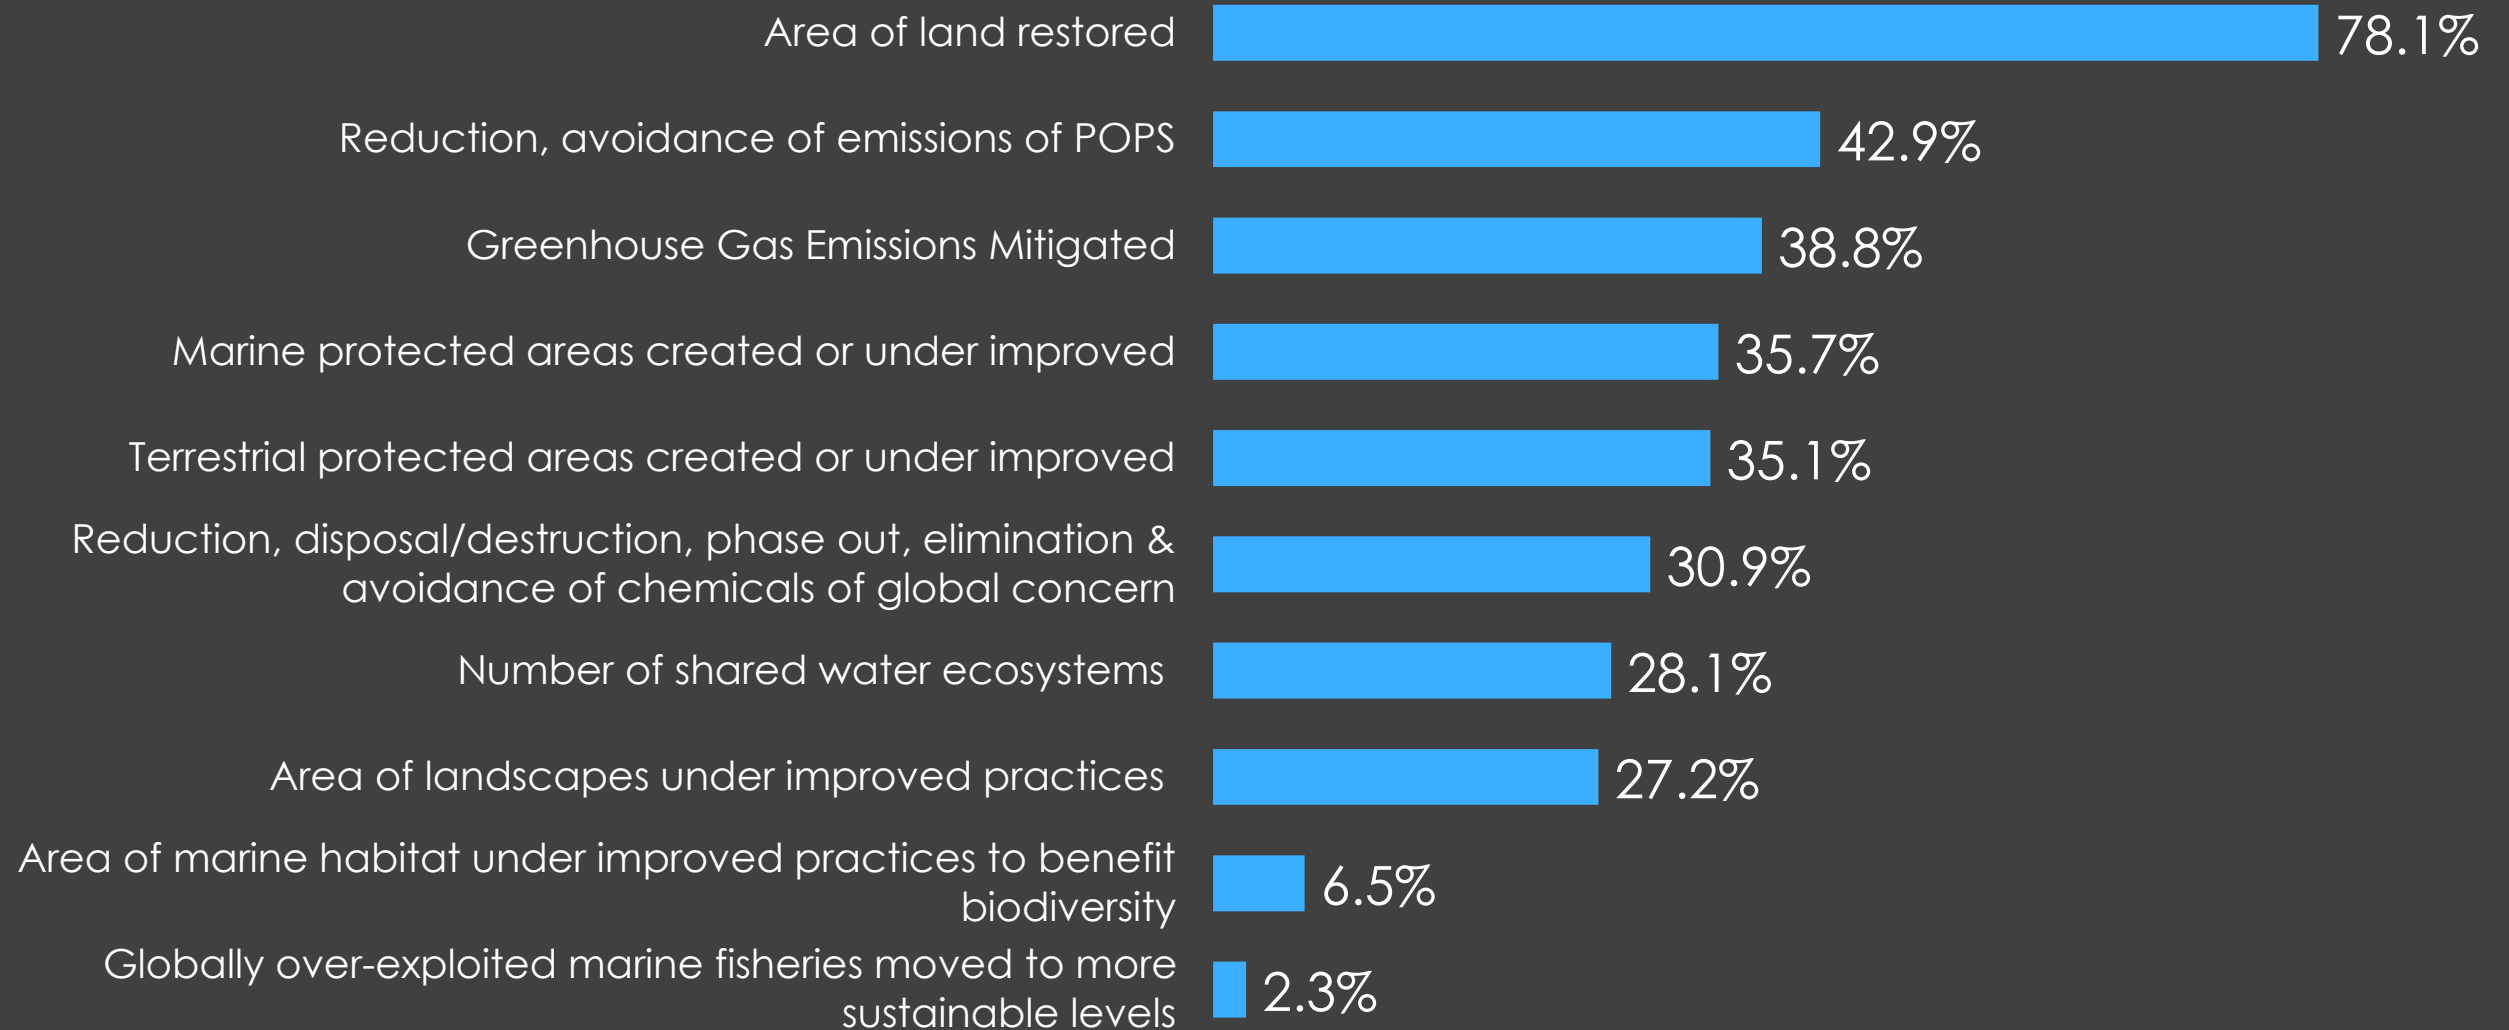

Transport sector is responsible for 1/4 of global CO2 emissions

The global vehicle fleet is 1.2 billion today; 2 billion by 2035; and 2X by 2050

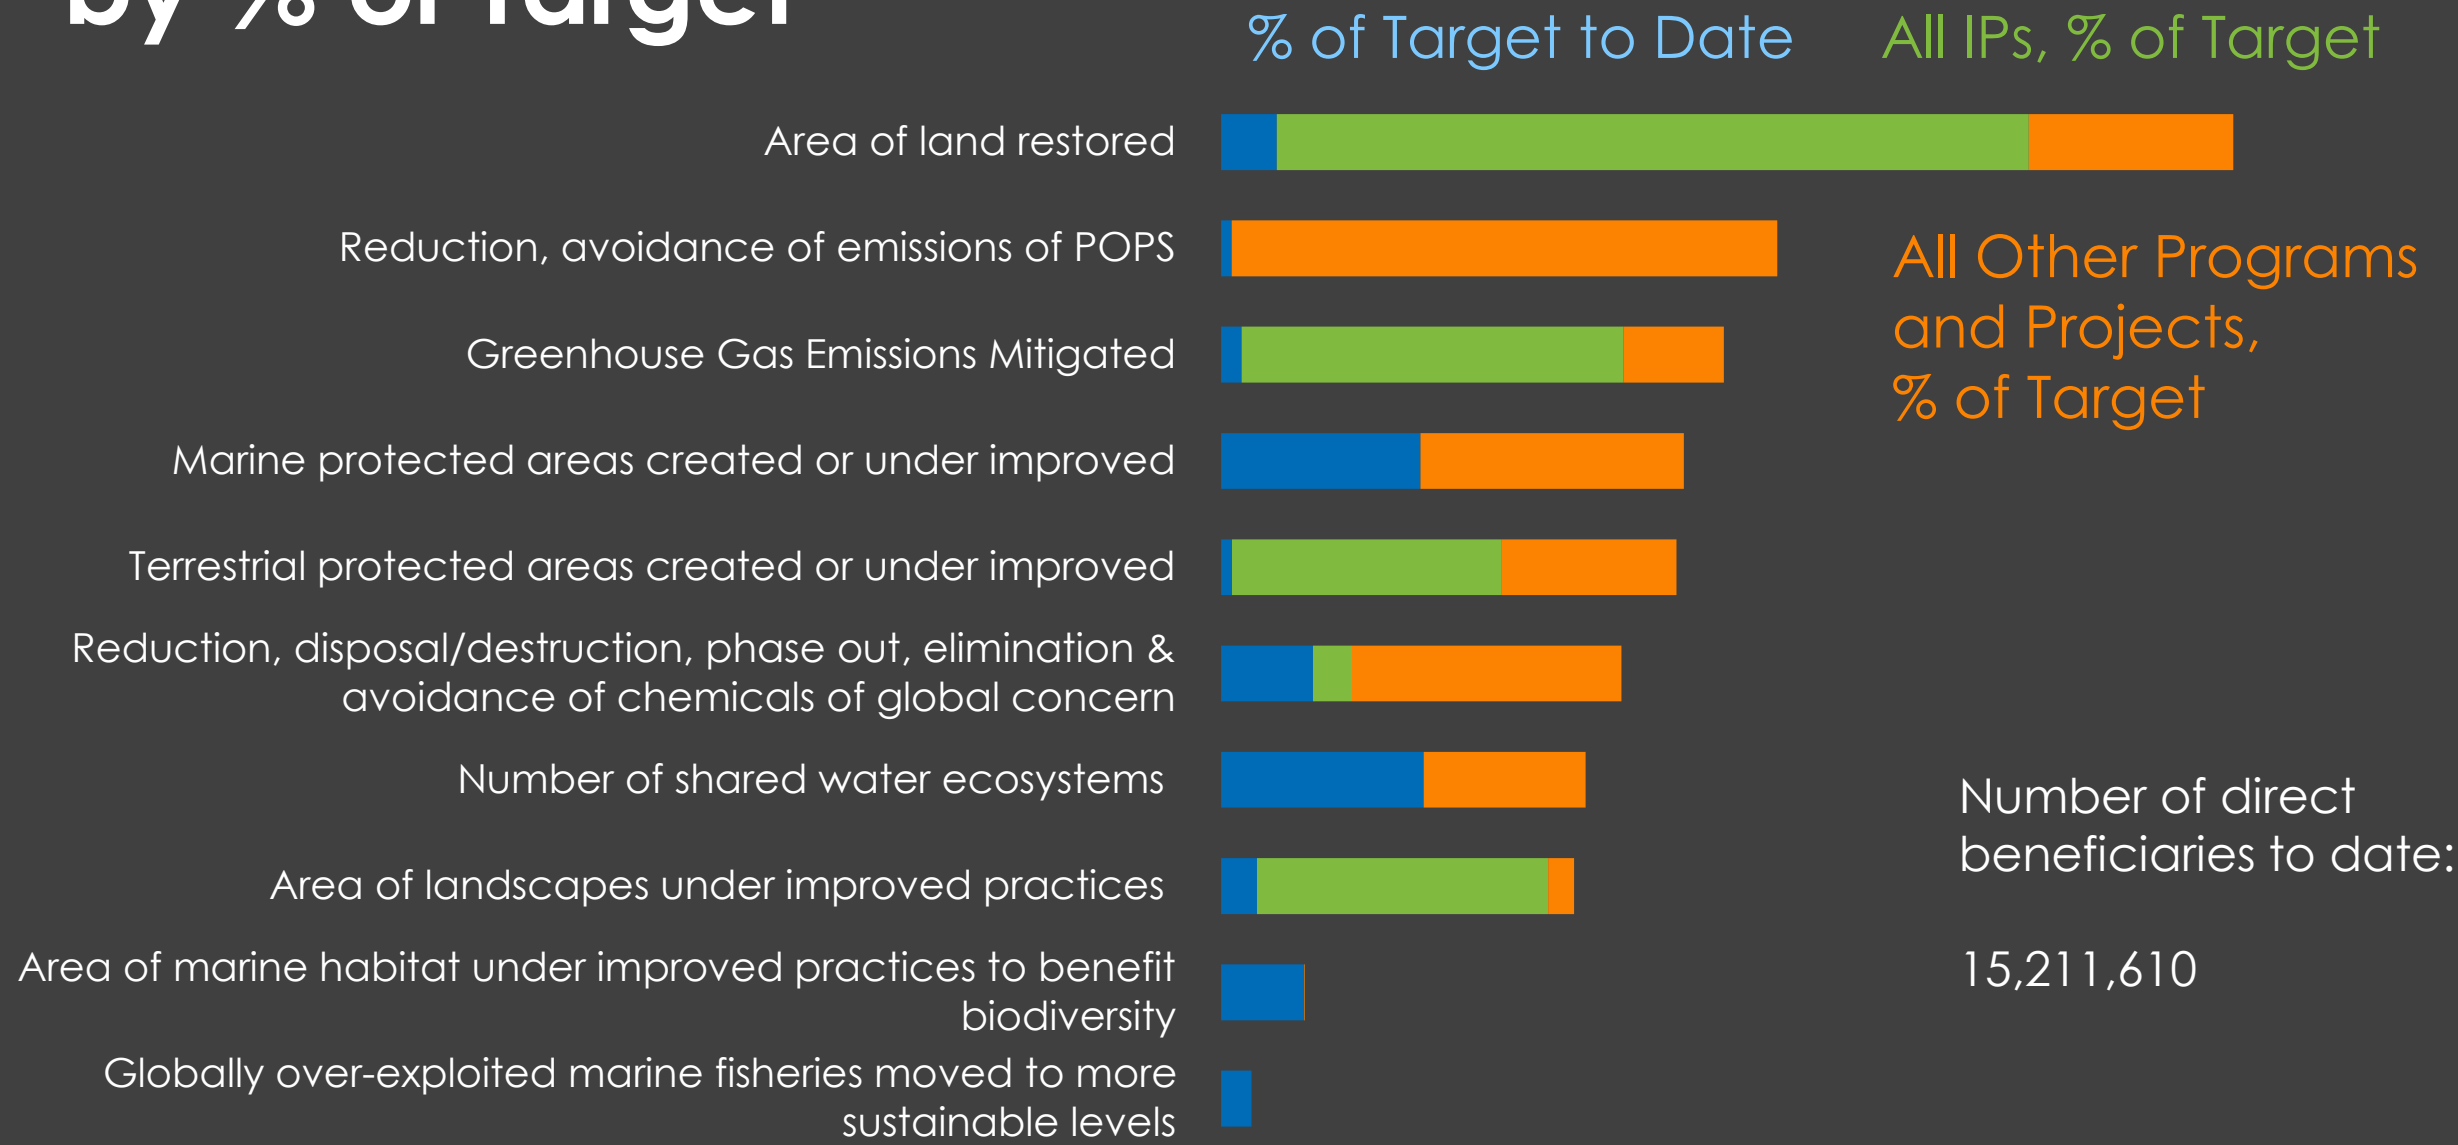

17 Countries

- Support adoption of country-specific policies and incentives
- Promote effective interaction between private and public
- De-risk investments in e-vehicles through scalable pilots
- Reduce overall costs, compared to individual country projects, minimizing duplication and promoting economies of scale
- Raise awareness and facilitate learning through *Global Thematic Working Groups* and *Regional Support and Investments Hubs*
- Expected reductions of 67 million tCO₂e

Total Expected Results against GEF-7 targets to date

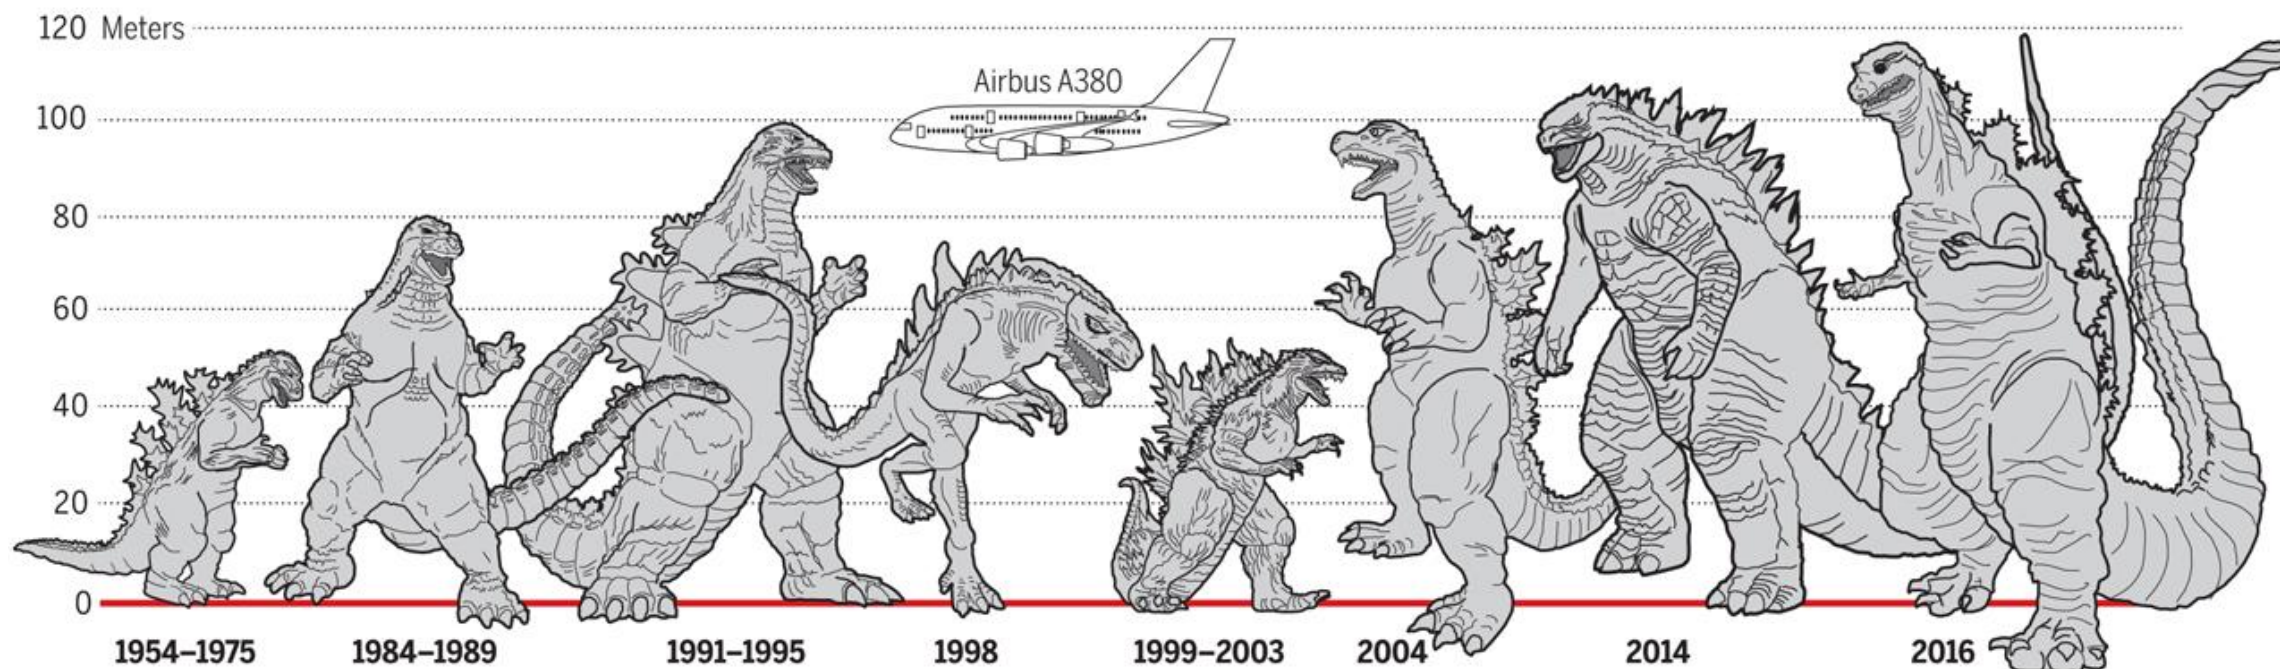

Delivered and Expected Benefits, by % of Target

Cultural anxiety and the evolution of a metaphorical monster

Godzilla has grown significantly since its debut, doubling in size in films produced between 1954 and 1991, a period defined by Cold War tensions and geopolitical instability in the Persian Gulf. Following a return to a more diminutive stature during a period of relative tranquility, it has resumed its rapid growth alongside an uptick in global strife.

Dominy & Calsbeek, 5/31/2019

A fable with a lesson for our times

A great enough disaster cancels all enmities and calls for collective action in the service of self-preservation,.. leading humanity to the realization that they must work together to defeat it.

-Susan Sontag

Now is the time for cooperation—across countries, across disciplines, across sectors, and across political lines. It is our only hope of mitigating the dire existential threats we face today.
